**Shanghai WTO Affairs Consultation Center : 2011 China's Trade Performance Report:World Economy Restructuring and China's Trade** before purchasing it in order to gage whether or not it would be worth my time, and all praised 2011 China's Trade Performance Report:World Economy Restructuring and China's Trade:

Since its accession to the WTO, China had been enjoying a rapid growth in foreign trade, which has become the major

driving force behind its surging economic development. However, the outbreak of the financial crisis at the end of 2008 left China with a fragile international market. Although there has been a gradual improvement in the international trading environment since 2010 following a steady recovery of the world economy, multiple challenges for the global economy still lie ahead with controlled trade protectionism becoming a trend. This book is the latest publication from the Shanghai WTO Affairs Consultation Center and the first report on China's trade performance. It analyses China's foreign trade environment, the foreign trade index and the quarterly index, illuminating the reasons behind fluctuating foreign trade. The book provides advice for entrepreneurs working in fast-changing environments, and is an excellent guide to policymakers involved in China's foreign trade. Published by SCPG Publishing Corporation and distributed by World Scientific for all markets except China. Contents: China's Trade Environment in 2010: A Steady Recovery of the World Economy Along with Controlled Trade Protectionism; China's Trade Policy in 2010: Stability as a Priority; The Performance of China's Trade in 2010: Its Features and Outlook; Appendix 1. Quarterly Analysis of the Performance of China's Foreign Trade and Its Characteristics in 2010; Appendix 2. The Construction Method of "China's Trade Performance Index" (CTPI). Readership: The book is an essential guide for foreign trade policy makers and all who are interested in foreign trade.
