As a reward for good schoolwork, he may get a coin after a week or month or whatever. In third grade Montessori, they are supposed to do 15 "goals" a week. If he does them all, he may get something like a Mercury dime, V-nickel, etc. If greater than 12 a week for 4 weeks in a row, he'll get the Braille silver dollar that he

found in the book and wants so bad. This is working like a charm!The first part of the book is great info for the young coin collector. What to look for, grading, where to find coins, how to take care of them, etc. Later in the digest are the various coins and estimated values.I also recommend the books/folders made of hard paper or posterboard which hold coins. The state quarters are fantastic for a kid to collect in these. Lincoln pennies are another.0 of 0 people found the following review helpful. just curiousBy bookladyI was just curious about some money my husband had left me; sitting in a box in the bottom of a closet. Needless to say, after I got this book I took out a safety deposit box at my bank. If I hadn't been curious, they woud all still be sitting there and who knows what could have happened to them!0 of 0 people found the following review helpful. very discriptiveBy Elizabeth Hillmannice book,nice layout.easy to look up coins.I buy the new addition every other year and it has never let me down.
