or you can't do them and you most likely know some effective ways to save already, without buying the book. For example: bartering and trading, instead of using money. there aren't any stores or markets in my area that would trade..they want money. Shopping at garage sales, pawnshops and thrift stores. I don't mind going to these and some do have nice things, its just i wouldn't want to wear worn out hand-me-down clothing from a stranger. another example: doing work or a favor for someone, in exchange for what you want, that they have. It's an okay idea, but only if they are willing to agree. Everyone do yourself a favor and google different ways to save money or get a better book.5 of 6 people found the following review helpful. All comes down to: you either don't need it, or you can DIYBy George\_MDIf I had to summarize the book, I'd say "Whatever you think you need, you either don't need it, or you can DIY from things available at home".I understand the authors tried very hard to come up with 573 ways to save, but most of the suggestions are ridiculous: make your own ketchup, make your own salad dressing, grow your own tomatoes etc. How about this one - collect cards and random pieces of scrap paper and then staple them together to create a fancy notepad.When I got to the "Save money by staying away from flu", I honestly thought that the authors were going to suggest making your own flu-shot from various fluids and spit of a sick neighbor.

Annual income twenty pounds, annual expenditure nineteen six, result happiness. Annual income twenty pounds, annual expenditure twenty pound ought and six, result misery."--Charles Dickens
