A wonderful book that teaches us to be successful is more about discipline, routine, following a code of honor, building relationships and about serving. My biggest takeaway is that to be successful or failing may have more to do about not knowing what we don't know vs. what we know. This is a simple read with deep insights. I highly recommend it, especially for anyone thinking about going to college, while not knowing what you want to do. Buy it, Read it, Act on it!By David GoddardA fantastic book, passionately written, outlining the need for more entrepreneurs in the USA to restore balance and prosperity to the US economy. Explains why those who have served in the armed forces have the most suitable skills and values to become successful entrepreneurs and is an irresistible call to action! Robert T. Kiyosaki wears his heart on his sleeve with this one.

Robert Kiyosaki's new book 8 Lessons in Leadership draws from his years at the Merchant Marine Academy at Kings Point and his service in the United States Marine Corps. With compelling stories and examples and an engaging way of comparing and contrasting two very different cultures and value systems, Robert shares the challenges he faced in transitioning to civilian life...where chain of command and team-over-self once so black and white were muddy and distorted. "Permission to speak freely, sir?" Count on it. This is Robert Kiyosaki and he does just that, in the forthright and no-nonsense style that readers have come to expect and appreciate. From Robert's perspective, military training shapes lives and supports entrepreneurship. The training, discipline, and leadership skills taught in the military can be leveraged for huge success in the civilian world of business. Highlights of 8 Lessons in Leadership include sections on Mission and Team, Discipline, Respect, Authority, Speed, the Power of Connectivity, Leaders as Teachers, Sales and Leadership.
