From Springer : Annual Report on China's Economic Growth: Macroeconomic Trends and Outlook (Research Series on the Chinese Dream and China's Development Path) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Annual Report on China's Economic Growth:

This book probes into China's economic growth in 2013 and predicts China's development prospects. China's GDP growth in 2014 continues to slow down, and is expected to be 7.6%, with the CPI stable at a level of 2.5%. With the pressures of structural slowdown, 2014 will be a year of adjustment, and there will be a slowdown in new initiatives to minimize risk. Against a background of policies to stabilize growth, change structures and promote reforms, and in order to assess the sustainability of development and transformation and upgrade of China's provincial regions, this book proposes a system for evaluating the country's development prospects and expounds economic growth at the provincial level.

From the Back CoverThis book probes into China's economic growth in 2013 and predicts China's development prospects. China's GDP growth in 2014 continues to slow down, and is expected to be 7.6%, with the CPI stable at a level of 2.5%. With the pressures of structural slowdown, 2014 will be a year of adjustment, and there will be a slowdown in new initiatives to minimize risk. Against a background of policies to stabilize growth, change structures and promote reforms, and in order to assess the sustainability of development and transformation and upgrade of China's provincial regions, this book proposes a system for evaluating the country's development prospects and expounds economic growth at the provincial level.

About the AuthorPing Zhang, Professor, Deputy Director in Institute of Economics, CASS. He graduated from CASS, Department of Economics in 1998. He had been to USA for collaborative research and training from Feb.1991 to Jun.1991 and to Netherlands for training program from Jan.1997 to July 1997.
