From Asian Development Bank : Asian Development Outlook 2014 Update: Asia in Global Value Chains

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Asian Development Outlook 2014 Update: Asia in Global Value Chains:

Developing Asia is maintaining steady growth momentum. Despite recovery in the major industrialized economies falling short of expectations, the region is on track to meet its favorable forecasts as policy stabilizes investment in the Peoplesquos Republic of China and signs emerge of a long-awaited turnaround in India. Inflation is held in check across most regional economies by benign international commodity prices, subdued domestic demand, and prudent policy. Even if global liquidity tightens earlier in 2015 than anticipated, its effect on developing Asia should be

modest. Asian Development Outlook 2014 Update reviews global value chains and how these cross-border production networks have enhanced income and employment in East and Southeast Asia. It considers what policy makers can do to encourage their improvement and spread to other parts of Asia and the Pacific.
