I wish that I would have been given this book for my high school graduation. I would dare to say that every graduate should be required to read it. This is the gift I gave my younger cousin and will give as a gift

for every grad party that I ever attend. I can say though, that this book is also not JUST for a graduate. The knowledge and information is great for anyone.³ of 3 people found the following review helpful. Sound advice for those who will use it
By ExtraSpecialK Unless you're planning to cast away all your worldly possessions and go live in the mountains, you're probably at least mildly interested in your finances, and since you're already logged onto the internet, I can safely assume that the cave life is not for you. Yes, pretty much everyone could use some sound financial advice, and the best time to get that help is when you're young; preferably as early as possible. The ground that Michael Masterson covers here is nothing new. He tells us to be frugal. Live within your means. Work hard and work smart. Invest wisely. Save as much as you can while you're young and let that money go to work for you. Follow these rules and your rewards will be great. Most of us have heard these lessons in one form or another, but what's special here is that Masterson shows us WHY these things are so important and exactly HOW they can pay off in the long run. "A penny saved is a penny earned" just doesn't sound the same as "a penny saved with compounding interest can make you a millionaire (albeit over a really, really long time)." Of course, none of the rules presented here will make you instantly rich. I find the title of the book to be a little sensational, but the point is clear: the path to wealth is in your hands, and it's one that has been trekked by many before you. Follow them and you can do the same. The only questions that remain are: will you read it, and will you use the advice within? I have not read Masterson's other books, but I imagine there's a decent amount of overlap. I would recommend this book particularly to new grads starting their first job, but also to anyone who just needs a push towards being smarter with their money.
