Manu Sharma : Financial Derivatives: A Case Study Based Learning before purchasing it in order to gauge whether or not it would be worth my time, and all praised **Financial Derivatives: A Case Study Based Learning**:

The book **Financial Derivatives: A Case Study Based Learning** is primarily designed for learners who want to make a career in the field of financial management. It provides clear and concise explanations of different derivative instruments and how those can be used for the purpose of risk management. Adequate amount of case studies, numerical illustrations and graphical demonstrations have been provided in the book to strengthen the theoretical and practical understanding of the learners. In addition, Excel-based solutions of practical problems given in the book help learners in putting the theories into practical applications.
