From WSPC : Financial Linkages, Remittances, and Resource Dependence in East Asia before purchasing it in order to gauge whether or not it would be worth my time, and all praised Financial Linkages, Remittances, and Resource Dependence in East Asia:

The purpose of this book is to empirically analyse the multifaceted nature of financial linkages in East Asia and to discuss the key policy challenges faced by the region's economies. Although the emphasis is placed on East Asia,

some of the chapters cover a broader area of countries depending on the aim of the study. Particular areas of focus in these studies include: the evolution of cross-border financial linkages in East Asia; long-run economic consequences of remittance inflows and natural resource dependence; and policy priorities for the financial integration and management of resource-rich economies.

About the Author Takuji KINKYO is a Professor of Economics at Kobe University in Japan. He received his PhD from School of Oriental and African Studies, University of London. He previously worked as Director, International Department at Ministry of Finance, Japan. His research interests include currency and financial crises, finance and development, and Asian economic integration. His work has been published in leading academic journals.
