**Paul Brenton : International Trade, Distribution and Development:Empirical Studies of Trade Policies (World Scientific Studies in International Economics)** before purchasing it in order to gage whether or not it would be worth my time, and all praised International Trade, Distribution and Development:Empirical Studies of Trade Policies

(World Scientific Studies in International Economics):

International Trade, Distribution and Development brings together a collection of papers that have sought to assess empirically the impacts of policy measures affecting trade. The carefully selected papers analyze the impact of trade barriers and their removal, with a focus on distributional consequences and economic development. Grounded in rigorous empirical analysis, this book covers a range of policy issues such as impacts of trade on wages, non-tariff barriers, trade preferences, export survival and carbon labelling. An invaluable reference for readers seeking to understand the impact of trade policies, the book also seeks to shed light on future research, especially for research on developing countries.

From the Inside Flap International Trade, Distribution and Development brings together a collection of papers that have sought to assess empirically the impacts of policy measures affecting trade. The carefully selected papers analyze the impact of trade barriers and their removal, with a focus on distributional consequences and economic development. Grounded in rigorous empirical analysis, this book covers a range of policy issues such as impacts of trade on wages, non-tariff barriers, trade preferences, export survival and carbon labelling. An invaluable reference for readers seeking to understand the impact of trade policies, the book also seeks to shed light on future research, especially for research on developing countries.
