Joseph Berwind : Investing in Solar Stocks: What You Need to Know to Make Money in the Global Renewable Energy Market before purchasing it in order to gage whether or not it would be worth my time, and all praised Investing in Solar Stocks: What You Need to Know to Make Money in the Global Renewable Energy Market:

1 of 1 people found the following review helpful. An Excellent Introduction to Investing in Solar Stocks By Aristidou Michael The book is an excellent introduction to the photovoltaic industry. Berwind's knowledge of the industry is substantial and book is therefore a valuable introduction for those with an interest in how the photovoltaic industry operates. To gain the most from the book one needs a basic background in finance, so I would therefore not recommend a purchase unless one is familiar with WACC, CAPM and DCF methods.

The solar industry is heating up. In the past two years alone, more than \$8 billion have been infused into the market, and 20 companies have gone public. The best news is that the solar market is still in its infancy, with plenty of room to expand.
