Skarulisprovokes thinking about investment opportunities all around you

Investment advisor Peter J. Tanous takes readers behind the scenes with Wall Street's movers and shakers, going head-to-head with 14 of America's top money managers and four leading financial economists to uncover their proven techniques for beating the market consistently.

.com It sometimes seems as if there were as many different investment styles in practice today as stocks in which to invest, with virtually every one of them--styles as well as stocks--offering varying levels of appeal to various people. Professional investment consultant Peter J. Tanous has come to understand this after three decades in the field, and in *Investment Gurus*, he presents a wide range of tactics and strategies that have been developed by acknowledged stock-picking experts. At the heart of this book are Tanous's interviews with 18 top money managers and academics, including Mario Gabelli, William F. Sharpe, Peter Lynch, Laura J. Sloate, and Merton Miller. The book concludes with "Your Roadmap to Wealth," which summarizes the success factors common to each of the money managers interviewed and suggests ways to develop an "intelligent personal investment plan." --Howard Rothman  
From Publishers Weekly  
Can a smart money manager working from the outside revive a bankrupt company with his clients' massive capital and a sharp management agenda? Are "value" stocks better than "growth" stocks? Can anyone "beat the market"? Is volatility okay? What about the role of the Internet in trading? These and other questions vital to stock market investors are aired in this remarkable series of interviews with investment industry leaders by Tanous, whose firm, Lynx Investment Advisory, finds money managers for billion-dollar clients. The author brings out the financial background, strategy and tactics of such mutual-fund miracle men as Fidelity Magellan's Peter Lynch ("what happens to the company... happens to the stock"); "momentum" trader Richard Driehaus ("look for earnings surprises") and "Super Mario" Gabelli, who champions "intrinsic private market value." Other big-name trader/managers also speak out freely here. In closing, the author constructs sample "portfolios" of guru-managed mutual funds for the reader's consideration. \$50,000 ad/promo; author tour. Copyright 1996 Reed Business Information, Inc.  
From Library Journal  
Investment adviser and novelist Tanous probes the minds and methods of 18 successful investors. Most of the interviewees are analysts; one is a professor and two are Nobel laureates in economics. Tanous asks each about his start in stocks, investing style, attitude toward the "efficient market" idea, sell discipline, etc. This is all about U.S. common stock investing?no options, shorting, or other arcana. Interestingly enough, although all these seasoned pros have handily beaten the market over the past five or so years, none appears in John Train's classic, *The Money Masters* (LJ 1/15/80), or its 1989 sequel, *The New Money Masters* (HarperCollins, 1990). Thus, success over an even longer period is more random than these gurus may want to believe. Tanous's two-chapter summary of the lessons and insights is more satisfying and instructive than the interviews. For comprehensive business collections. ?Alexander Wenner, Indiana Univ.
