Babbell In the Executive MBA Program of the Wharton School, where I teach, we have instituted a new finance course on structured financial products and asset-backed securitizations, from the corporate treasurer's perspective. This book featuring issuer

perspectives on securitization fits our course perfectly, and is popular among the executive MBA students. The authors are very knowledgeable and are able to communicate well. I highly recommend this book to anyone who wants to delve into this relatively new area of finance.

Issuer Perspectives on Securitization provides insight into the basics of securitization as well as more advanced techniques such as nontraditional asset-backed securities, transactional due diligence, and accounting rules and techniques.
