From Routledge : Labor, Globalization and the State: Workers, Women and Migrants Confront Neoliberalism (Routledge Contemporary South Asia Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Labor, Globalization and the State: Workers, Women and Migrants Confront

Neoliberalism (Routledge Contemporary South Asia Series):

This book explores the impact of neoliberal globalization on labour markets and the state in the developed and developing world. It focuses especially on the United States and the economies of Asia and, in particular, India. Liberalized trade and investment are thought by neoliberals to be the best levers for raising labour standards, provided labour market flexibility and capital market restructuring accompany them. Labour market flexibility and capital market restructuring, at a first glance, appear to be complementary and symmetric policies. In practice, however, they might have very asymmetric consequences. This book addresses these issues, and it presents a comprehensive analysis of the key questions such as: How far is globalization a threat to the conventional systems of wage fixation, employment pattern, and basic rights at work in both developed, as well as underdeveloped countries? Are casualization and informalization of the workforce direct outcomes of deregulation? How do labour organizations cope with the volatility of the labour market? Are the existing labour market conditions and forms of labour organizations misfits in the globalized business world? Is it at all feasible to choose a high road that combines some degree of labour market flexibility with better labour standards? This book will be of interest to academics working on International Development, Development Economics, Political Economy, Comparative Labour Studies and Asian Studies.
