This is a second publication I bought. I had an older publication while I was in college. It was a recommended side reading in one of my classes. I bought this book the second time as reading and discussion

material within a small group at my work place. Of course I recommended this book to the team. 1 of 1 people found the following review helpful. In this illuminating study of corporate America's most critical issue—leadership—world-renowned leadership guru Warren Bennis and his co-author Burt Nanus reveal the four key principles every manager should know: Attention Through Vision, Meaning Through Communication, Trust Through Positioning, and The Deployment of Self. In this age of "process", with downsizing and restructuring affecting many workplaces, companies have fallen trap to lack of communication and distrust, and vision and leadership are needed more than ever before. The wisdom and insight in *Leaders* addresses this need. It is an indispensable source of guidance all readers will appreciate, whether they're running a small department or in charge of an entire corporation.
