4 of 5 people found the following review helpful. College Students or Small Business Owners - This One Is For YOU! By OlioBlogger My first Portable MBA book was in Marketing and I learned quite a bit by reading and studying this book. So much so that it leap-frogged me way ahead of others in my department who had college degrees. I am NOT a strong proponent of college degrees, but I am a strong proponent on education, and the MBA Series of books are excellent for those who have no time for traditional college courses. The Portable MBA can give anyone a strong advantage, even to those who intend to go to college and are not sure as to which discipline they wish to pursue, whether it be accounting, finance, economics, marketing, whatever. The Portable MBA - Fifth Edition is an excellent

primer into each one of these subjects and more, this book definitely covers all the basics of business. Trust me, if you plan on getting an MBA, read and study this book before you begin your official course of study, and you will leap ahead of everyone else in your class. If you are starting your own business and have no time for a college curriculum, then get this book and bury yourself in it. You will NOT regret it. Good Luck!
