Peter F. Drucker : The Practice of Management before purchasing it in order to gage whether or not it would be worth my time, and all praised The Practice of Management:

By Jackal There is a lot of self-centered managers thinking they are very good, but in reality they are below average human beings both intellectually and ethically. There are also many managers that are good people and try to do their best. I think all managers belonging to the latter category should read this 60 year old book. Drucker wanted managers to contribute to humanity by being good managers. I would say that it is inspirational

to read Drucker's words knowing that they were written such a long time ago. The book is written in a very engaging manner and is not what you would expect for such an old book. Managers today struggle with pretty much the same issues as identified in this book. This is not to say that this book contains everything, but by reading it, you realise how much useless or fluffy stuff is written in many current management books. 1 of 1 people found the following review helpful. Great Read Not Just For Business Majors By Stephanie Medeiros I first got this book for a business management class I was taking as a requirement for transferring over to another college and thought it was going to be pretty boring. Maybe it was the combination of the writing and my professor, but I actually REALLY enjoyed this book and it came in excellent condition when I bought it. Even if you're not majoring in business or don't ever intend to be in management of some kind in a corporate setting, this is still a great read on people in general. 0 of 0 people found the following review helpful. Five Stars By AJA++++++

A classic since its publication in 1954, *The Practice of Management* was the first book to look at management as a whole and being a manager as a separate responsibility. *The Practice of Management* created the discipline of modern management practices. Readable, fundamental, and basic, it remains an essential book for students, aspiring managers, and seasoned professionals.
