By J.K. Patton I am a busy leader, juggling work, family, sports, etc., so I don't have a ton of time to read. I love audiobooks for this reason. I threw this on the mac and synced it with my phone and I was off. I listened to this on the road as I travel quite a bit, and it was super convenient. As for the material - if you are a leader this is a must read! I have seen Cy speak as the keynote twice now, and this is the leadership style that I tend to pattern myself after. I have read/listened to TONS of leadership books, and this one is quite simply the best I have seen. I have been in leadership for 15 years and seen a lot, there isn't much that this one won't prepare you for. So this one is good for the leader to read, but it is targeted for the employees. I put this on the yearly goals last year for my team to read and then we had conversations about it at mid year. Meanwhile, there is a leader's version of this book that is very easy to find - called Reality Based Leadership, you can get it on here: <http://www.com/Reality-Based-Leadership-Restore-Workplace-Excuses/dp/0470613505> If you are a leader - get these two valuable resources - fantastic stuff here!

By Kim Parker I read several business books a year, and this is far and away the best and most applicable book I've read in recent memory. I was able to immediately put Cy Wakeman's teachings to work, both as an individual and as a manager. I bought copies for my entire team to read. Her approach to the self-evaluation is brilliant, and the 'stick with the facts' strategy is something that can be implemented immediately. I've already seen a change in my own behavior, as well as the culture of our team. A must read at every stage of your career!
