Daniel R. Solin : The Smartest Portfolio You'll Ever Own: A Do-It-Yourself Breakthrough Strategy before purchasing it in order to gage whether or not it would be worth my time, and all praised The Smartest Portfolio You'll Ever Own: A Do-It-Yourself Breakthrough Strategy:

4 of 4 people found the following review helpful. One of the Best Investment Books on Index InvestingBy StephenThis author writes in a straight forward easy to comprehend style and makes a very compelling case as to why Passive Index Investing using low cost index funds from Vanguard or Schwab that include diversifying using different

asset classes such as Total US Market, Large Cap, Small Cap, Europe, REITS, Pacific, Short Duration Bonds, Emerging Markets, etc. and re-balancing once or twice a year is for the vast majority of retail investors is the only sure way to most closely match the market benchmarks such as the SP 500. I just wish I would have become familiar with this strategy 25 years ago. You can use this strategy by purchasing either Index Funds such as ETF's in your non-retirement account and Index Fund Mutual Funds in your retirement accounts. Begin by determining your risk profile such as 40% Bonds and 60% stocks, diversify using the asset classes, buy and hold, and re-balance. This author is a terrific writer and his series of books - the Smartest... are all very noteworthy. Every new and experienced investor should read this book. It is a real eye-opener. You will learn that even the professional money managers are unable to consistently pick winning stocks and time the market. So if they can not successfully match or beat the market benchmarks, how in the world can a retail investor? That is why purchasing low cost Index ETF or Mutual Funds are the best way to manage risk and diversify by purchasing the entire market within each asset class. You must read this book and his previous book "The Smartest Investment Book You'll Ever Read! A terrific web site that I used to further educate myself on Index Investing is the website for Index Fund Advisors located in Newport Beach, CA which will manage your portfolio for you using the Index Fund strategy discussed in this book. IFA manages a portfolio of over 1.8 Billion dollars. Take a look at their website, it is very detailed and quite impressive. I purchased this book used in hardback from a re-seller at 60% the suggested price of the book! 0 of 0 people found the following review helpful. For Every Investor By Prof. Buck This is book is essential for all mutual fund investors. Especially for those just out of college. Easy to read, easy to understand and easy to classify as one of the best ever books for those that want to avoid the high fees charged by the financial services industry. His recommendation for an "index fund portfolio" works. After investing on my own for over 35 years, I discovered what I had been doing is exactly what Dan Solin was recommending is exactly what I had been doing for years. In fact, this is but one of his really well written books on investing and personal finance. 0 of 0 people found the following review helpful. I couldn't recommend the book and it's investment methods more. By Rusty Williams The book adhere's to John Bogle's philosophy of investing in index funds with low to no management fees. Clear and convincing explanations on all of the author's points. This philosophy has served me well for several years. I couldn't recommend the book and it's investment methods more.

Bestselling author and financial blogger, Dan Solin, provides real do-it-yourself investors the means to create a dynamic-and safe- portfolio that mimics those constructed for some of the major institutional and trust investors in the country. Readers can maintain complete control over their money-and not sacrifice precious points to an advisor or broker. Using a strategy that minimizes volatility and maximizes returns, Solin makes investing according to the principles of the most sophisticated financial models accessible to individuals in a way that has never been possible before. As readers have come to expect from Solin, implementing this plan is as simple as one, two, three: open an account with a discount broker; determine the appropriate asset allocation using the simple questionnaire in the book or online; input pre-determined ETFs (Exchange Traded Funds) and the allocations for the level of the investor's individual risk profile. This is the only book that provides the information and practical guidance that readers need to achieve the very best results with the minimum risk, on their own.

Five Best Money Books of 2011: "Building on his other 'Smartest' money books, Solin lays out sensible ways of constructing safe portfolios that are customized to where you are in life. As with his other advice, Solin favors low-cost, passive portfolios that are diversified and tempered for risk."
