From University of Chicago Press : The United States in the World Economy (National Bureau of Economic Research Conference Report) before purchasing it in order to gage whether or not it would be worth my time, and all praised The United States in the World Economy (National Bureau of Economic Research Conference Report):

The United States in the World Economy offers the results of a conference organized by the National Bureau of Economics in 1987. The volume includes background papers prepared by nine academic economists, personal statements by individuals prominent in government and business, and summaries of the discussion that followed the presentations. Among the topics considered are foreign competition in Latin America and the Asian Pacific Rim, Third World debts, innovations in international financial markets, changing patterns of international investment, international capital flows, and international competition in goods, services, and agriculture. Prepared for a sophisticated but non-technical audience, these papers present complicated economic issues clearly, indicating the many ways in which the American economy influences and is influenced by economic events and conditions around the world.

From Library Journal In an area where there are more myths and misperceptions than reality, this volume, edited by a Harvard economist, sheds light on the facts. Richly documented with charts, tables, and bibliographies, the essays by academic economists and individuals in business and government cover the spectrum of issues in international trade and finance. Growing out of a 1987 National Bureau of Economic Research conference, the volume upholds that body's high standards. Each section contains a major, technically oriented article followed by shorter articles by practitioners. Readers of all backgrounds will find something new and important here. Indispensable. Richard C. Schiming, Mankato State Univ., Minn. Copyright 1988 Reed Business Information, Inc. From the Back Cover This book offers the results of a conference organized by the National Bureau of Economic Research. The volume includes background papers prepared by nine academic economists, personal statements by individuals prominent in government and business, and summaries of the discussion that followed presentations. About the Author John Y. Campbell is the Otto Eckstein Professor of Applied Economics at Harvard University and a research associate of the National Bureau of Economic Research. Martin Feldstein is the George F. Baker Professor of Economics at Harvard University and president and CEO of the National Bureau of Economic Research. He is the editor of many books, including "Privatizing Social Security" and "International Capital Flows," also published by the University of Chicago Press. John Y.
