Naveen B. Kumar, Sanjay Mohapatra : The Use of Technical and Fundamental Analysis in the Stock Market in Emerging and Developed Economies (0) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Use of Technical and Fundamental Analysis in the Stock Market in Emerging and Developed Economies (0):

This book gives a scientific and systematic approach to trading in emerging stock markets. As professional traders do

not trade purely on the basis of the economic fundamentals, but also take into account market movements generated by other factors (noise trading), knowledge of technical analysis is important to anyone who would like to participate successfully in the stock market. Second, the existence of a skew towards reliance on fundamental analysis at longer horizons suggests that models based on economic considerations will be more important on the long run. Third, the existence of a skew towards reliance on technical analysis at shorter horizons suggests that models based on short term considerations (noise) will be more important in the short term. The present book gives a base for practitioners as well as students to learn the tricks of the trade through examples and case studies.

Authors Kumar and Mohapatra present students, academics, researchers, and professionals working in a wide variety of contexts with a guide to investing and trading in emerging stock markets. The authors have organized the main body of their text in five chapters devoted to an introduction to various approaches, data analysis and interpretation, and a wide variety of other related subjects. Naveen B. Kumar is a faculty member of the Indian School of Business. Sanjay Mohapatra is a faculty member of the Xavier Institute of Management, India.
