David Greenaway : The World Economy: Global Trade Policy 2010 (World Economy Special Issues) before purchasing it in order to gage whether or not it would be worth my time, and all praised The World Economy: Global Trade Policy 2010 (World Economy Special Issues):

This is the seventeenth volume in an annual series in which leading economists provide a concise and accessible evaluation of major developments in trade and trade policy. Examines key issues pertinent to the multinational trading system, as well as regional trade arrangements and policy developments at the national level

From the Back Cover
The World Economy: Global Trade Policy 2010 is the seventeenth in an annual series in which leading economists provide a concise and accessible evaluation of major developments in trade and trade policy. Each annual volume examines key issues pertinent to the multilateral trading system, as well as regional trade arrangements and policy developments at the national level. Each volume also provides assessments of the World Trade Organization's recent Trade Policy s. The 2010 issue analyses global trade policy in Turkey, China and The Dominican Republic, and a survey by Tarlok Singh questions whether international trade does cause economic growth. The book also includes chapters exploring WTO issues, and a special section on regional trading agreements. This book is a vital resource for researchers, analysts and policy-advisors interested in trade policy and other open economy issues.
About the Author
David Greenaway is Vice-Chancellor of the University of Nottingham, where he is also Professor of Economics and Research Fellow in the Leverhulme Centre for Research on Globalisation and Economic Policy.
