Philip J. Romero, Tucker Balch : What Hedge Funds Really Do: An Introduction to Portfolio Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised What Hedge Funds Really Do: An Introduction to Portfolio Management:

0 of 0 people found the following review helpful. Good basic info for people not familiar with the financial ...By Robert Bates Required reading for a quant trading course. Good basic info for people not familiar with the financial markets in general, hedge funds in specific. 3 of 3 people found the following review helpful. fundamental

understanding of quantitative financial analysis By David E Carlton Good introduction to understanding today's financial markets that go beyond public exchanges. Provides basic financial mechanics that any investor should know. 2 of 2 people found the following review helpful. An eye-opening introduction to computational investing By Carl Frost A real eye-opener to how readily available historical stock data is, and a very practical guide to maximizing gain and reducing risk in computational portfolio management.

When I managed a hedge fund in the late 1990s, computer-based trading was a mysterious technique only available to the largest hedge funds and institutional trading desks. We've come a long way since then. With this book, Drs. Romero and Balch lift the veil from many of these once-opaque concepts in high-tech finance. We can all benefit from learning how the cooperation between wetware and software creates fitter models. This book does a fantastic job describing how the latest advances in financial modeling and data science help today's portfolio managers solve these greater riddles. —Michael Himmel, Managing Partner, Essex Asset Management I applaud Phil Romero's willingness to write about the hedge fund world, an industry that is very private, often flamboyant, and easily misunderstood. As with every sector of the investment landscape, the hedge fund industry varies dramatically from quantitative "black box" technology, to fundamental research and old-fashioned stock picking. This book helps investors distinguish between these diverse opposites and understand their place in the new evolving world of finance. —Mick Elfers, Founder and Chief Investment Strategist, Irvington Capital

About the Author Dr. Philip J. Romero is an economist, policy analyst, and applied mathematician, and former California chief economist. Tucker Balch is a former F-15 pilot, Professor of Interactive Computing at Georgia Tech, and co-founder of Lucena Research, Inc., an investment research firm.
