This book is extremely, practical, detailed, and informative of what it is really like to work on the set of a film. It not only is quite comprehensive in its scope of the jobs there are out there on set, but it is detailed in its explanations of

what they entail. It even includes a schedule of what your day would probably look like in any given job. My only wish is that there was a book for the "off-set" jobs like the production designer and the rest of the art department (even though, they aren't really that off-set, they aren't in the book).7 of 7 people found the following review helpful. Excellent resource for people interested in the movie businessBy Cameron M. Wow! If you're really interested in the movie business then this book is fantastic! Forget the glamour and the stars, Brian Dzyak explains in easy to understand language what really happens on a movie set and simply explains what each of the positions (and there are a lot of them) are that make up the well-oiled machine that is the movie crew. The author answers practical questions such as "Do I have to move to L.A.?" and "How do I meet the right people in the business?" and then goes on to describe the various jobs on the set: costumes, director and their unit, the camera department, grips, the electric dept., sound, special effects, sets and props, publicity, makeup and hair, and how all of the jobs works together to make a great movie. Highly recommended for people who are interested in getting into the movie business or are curious about how movies get made.0 of 0 people found the following review helpful.
