MindJoe Watson has delivered an essential guide to finding more stable and rewarding work in these tough times. Growth-industry by growth-industry, he lays out the facts and offers words of encouragement that make finding that better job seem doable. Each industry overview has an appendix with resources to get the ball rolling. The personal accounts of workers who have successfully made the transition from declining to rising industries, often by just transferring existing skill sets, were also helpful. The chapter on becoming an entrepreneur was a real eye-opener because it seems counter-intuitive in a recession, but makes sense. Anyone trying to get back to work or struggling in a dead-end job needs to read this book!
