I was at my physical therapist's office and impressed that she'd gone out on her own. She shared her story of seeing Nancy Anderson and then having the tools and courage to open her own practice. Intrigued, I read the book and felt like I had gained a lot of insight into what I wanted to do. I'm always seeking more self-development opportunities so this was the perfect book for me at the time. Fast forward 12 years later - I was unhappy with my

work, knew what I wanted to be doing, but couldn't see a way out. I re-read this book and also read WWP Mid Life and Beyond. Since I live in the SF Bay Area, I decided to make an appointment with Nancy. What can I say? She is intuitive, supportive, quickly and easily identified my obstacles, and got a very clear sense of what I'm meant to be doing. What's interesting is that she informed me of all of this even before I had shared all my current endeavors with her. She is that good! Her powerful insights and full confidence in me, led me to finally leave my 13 year position in academics and start my own coaching practice. Perhaps I would have gotten to this point eventually, but I credit Nancy with being the catalyst that helped me realize my full potential and that it was possible to live my dream. The way I imagined my life 15 months ago when I first saw her is coming true - being able to set my own schedule, devote time to meditation, exercise, and then to work hard in full concentration on my business and passion... bliss. I strongly recommend this book for anyone wanting to pursue their passion and calling in life. Do the exercises, open your heart and mind, and don't be afraid to allow yourself to live your passion. I am living proof that if you work on yourself and are willing to put in the work - Nancy's insights and guidance really works! Whether in person or through the book, she is your biggest champion and knows you have the ability to live your dreams.

Life ChangingBy Kristi Stangeland (Consignment)I read this book several years ago and what a wonderful journey I began!It was life changing.I was an accountant working in corporate america when I bought your book. My job was fine but there certainly wasn't any passion. My children were young and wanted me to stay home and my husband was doing well with his job. He encouraged me to quit which was a difficult decision as change is hard. However, quitting was one of the best decisions that I made. Now that I had more time, I took out the book and started doing the work. I discovered how I had suppressed my artist and creativity. Using this knowledge and Nancy's process, I started my own business, Mustang Web Designs. It was the perfect job - I was able to use my business sense, my newly discovered (as a result of your book) artistic side and I had flexibility to be with my children. Also, as a result of the book, I started meditating which took me down a whole other path. Two years ago, that path started tugging and now I'm really working with passion as a feng shui consultant.This month, I ran into a young mother. She was trying to decide if she should go back to her corporate job or find something else. I handed her this book.

I found Nancy Anderson's writing style to be easy to read and her suggestions to be very helpful. She peppered her narrative with stories that demonstrated the successes of her clients and showed a genuine concern for helping others. I would highly recommend this book to anyone who is struggling with any life issues, whether job hunting or otherwise.

In this twentieth anniversary edition of her perennial bestseller, Nancy Anderson shows readers how following their passion to find their special niche is the most effective and rewarding approach to business and career success. *Work with Passion* follows the step-by-step program Anderson implements in her career counseling practice, carefully guiding readers through each stage. The program follows the ten "Passion Secrets" of successful people, and topics include clarifying goals, trusting instincts, doing research, and meeting others who are passionate about their work. "I have found that we love to hear success stories," Anderson writes, and each chapter tells those powerful stories of people who have overcome adversity and realized their dreams. *Work with Passion* has a wealth of inspirational guidance, from the broadest kinds of visionary encouragement to very practical tips on networking, developing a resume, and writing a query letter that gets results. This comprehensive course in career counseling is for everyone who would rather brag about their career than complain about their job.
