**Frances A. Karnes : Young Women of Achievement: A Resource for Girls in Science, Math, and Technology** before purchasing it in order to gage whether or not it would be worth my time, and all praised Young Women of Achievement: A Resource for Girls in Science, Math, and Technology:

0 of 0 people found the following review helpful. Women in Science.By MichaelI gave this as a gift to a young family member. She loved it. It gave her confidence that women can enter the world of science just like men do. It's a book of

little autobiographies of women who have entered the world of science and math. I cannot think of another book that deals with this subject in such a personal way. 1 of 1 people found the following review helpful. Great Book By Chris brus This is a great role-modeling book for Junior High and High School girls interested in a science career. Buy it for your daughter!

This upbeat, very useful resource guide will give young women everything they need to start exploring and planning a career in science, math, or technology. Part I introduces readers to the many exciting career opportunities available in the sciences and provides specific strategies for planning for a future career in these areas. Part II recounts true stories of girls and young women in the sciences, detailing how they got involved and what they have accomplished. Part III offers timelines of extraordinary women throughout history, inspiring quotations, a list of Web sites specifically geared toward women in the sciences, suggestions for science-oriented computer software, and many other recommended resources. If you have an interest in science, this excellent guide, full of useful information, will start you on the path toward realizing your career dreams.

"...an excellent reference for encouraging middle and high school girls to consider and pursue careers in these fields." -- NSTA Recommends "Librarians and career counselors in middle and high schools need copies of this book to share with young women students." -- Kliatt, November 2002 "This upbeat resource guide will give young women everything they need to start exploring and planning a career..." -- Adolescence, Winter 2002 "highly recommended as a valuable resource for all middle and high school mathematics and science educators and counselors." -- Mathematics Teacher, February 2003
